weaknesses of

Explanation of Issues--you end with a thesis statement. That basically identifies the central piece of the paper.

The Evidence then supports or disputes this central thesis I agree!

Yes

Conclusions and/or related outcomes (implications and consequences).

COMMENT: In this row, are we evaluating student's ability to tie everything together?

If yes, I would imagine that a student would be evaluating the quality of the evidence, weaknesses in a position and in general making a final conclusion based on both evidence AND

if desired.

I think here that we are not talking about the conclusion of a paper, but about the ultimate claim (or series of claims) the student makes. Presumably, the student isn't making claims based on assumptions (I'm sure that's not what you meant), but exposing assumptions?

Perhaps what we mean here is the "reasoning" component, i.e., how well the author links the evidence to the claim/hypothesis. I agree.

Yes-- plus, how the author understands the broader perspective or big picture of a conclusion or recommendation. Does "systems

Instructions to Align Assignment to Learning Outcomes

Title: CT Assessment Faculty Assignment Alignment Due Tuesday, December 10th

Dear CT Assessment Faculty,

Many thanks for your work, input, and feedback so far! With the learning outcomes just made available on Blackboard this afternoon, we are ready for the last critical step for the fall quarter on the project which is to align your course(s) assignment to the critical thinking Outcome (TU) department program learning outcome(s) (PLO) and upper division GE outcomes (as appropriate) on Blackboard. The due date is Tuesday, December 10th If you would like one-on-one support, I am on-site today (as late as needed) and can come to your office. You can also call me at 925.872.6828 or email me between now and the due date to arrange phone support. Later this afternoon, I will be posting a video on the shared Blackboard site so that you can see the process.

Bernie is off-site through Friday; however, he has scheduled Tuesday, December 10th from 1:00pm to 3:00 pm for you to drop-in for one-on-one help. I am in the process of verifying additional time he can provide drop-in support on Monday.

Critical Thinking Assessment Project

Faculty Update Meeting
November 8, 2013

CT Faculty Update Meeting Outcomes

- ‡ Understand how the University Blackboard Outcomes projects relate to and support each other
- ‡ Review progress on CT Assessment Project objectives and project deliverables for fall 2013, winter, and spring 2014
- ‡ Review of Bb Outcomes and identify how to align your course assignment to the CT ILO
- ‡ Share your key course assignment(s) and articulate how the CT Assessment support team can help you in winter quarter

Using the common critical thinking rubric, participate in sessions to norm and assess assignments

W (department meetings, symposium) to review results, draw conclusions, and develop recommendations for curriculum redesign and/or instructional improvements in program

o (1) (atP) (p) (u) (r) (D) (r) (p) (r) (C)

Critical Thinking Assessment Results	
Question	Response
1. The author's main purpose in writing this passage is to	analyze the impact of the author's argument on the reader's perception of the author's credibility.
2. Which of the following best describes the author's attitude toward the subject of the passage?	The author is highly skeptical of the subject and is attempting to undermine the reader's confidence in the author's argument.
3. The author's argument is based on which of the following assumptions?	The author assumes that the reader will be influenced by the author's use of emotional language and rhetorical devices.
4. Which of the following best describes the author's use of evidence in the passage?	The author uses anecdotal evidence and personal observations to support their argument, rather than objective data or research.
5. The author's argument is most vulnerable to which of the following criticisms?	The author's argument is based on a narrow and biased selection of evidence, and fails to consider alternative perspectives.
6. The author's argument is most vulnerable to which of the following criticisms?	The author's argument is based on a narrow and biased selection of evidence, and fails to consider alternative perspectives.
7. The author's argument is most vulnerable to which of the following criticisms?	The author's argument is based on a narrow and biased selection of evidence, and fails to consider alternative perspectives.
8. The author's argument is most vulnerable to which of the following criticisms?	The author's argument is based on a narrow and biased selection of evidence, and fails to consider alternative perspectives.
9. The author's argument is most vulnerable to which of the following criticisms?	The author's argument is based on a narrow and biased selection of evidence, and fails to consider alternative perspectives.
10. The author's argument is most vulnerable to which of the following criticisms?	The author's argument is based on a narrow and biased selection of evidence, and fails to consider alternative perspectives.

‡ To evaluate student work demonstrating a particular student learning

Review of Project Timeline and Deliverables

During Fall 2013:

- ; Participate in training on the Blackboard assessment platform;
 - ; Assign identified assignment to course (upper-division GE or major capstone/senior course);
 - ; Collect assignments and apply critical thinking rubric using the Blackboard electronic platform
- %Align course assignment to Critical Thinking ILO

Deliverable: Assignment and rubric developed, and if class taught in Fall quarter, rubric applied to assignment in Blackboard Outcomes.

Review of Project Timeline and Deliverables

During Winter 2014:

- % Review results from Fall Quarter;

- % Collect additional data from Winter quarter courses;

- % Participate in program-level and campus-wide discussion of Fall quarter results, draw conclusions, and develop recommendations for closing the loop for your program;

- % Provide feedback on how process and rubric can be improved for the following year when another Institutional Learning Outcome will be assessed.

Deliverable: Results from Fall quarter analyzed and documented, and recommendations identified for making course and/or program improvements.

(Institutional level review to be done by ILO/GE subcommittees)

2014 CSUEB Faculty Learning Communities

Title: Diversity and Social Justice Institutional Learning Outcome (ILO) Assessment

Facilitator:

To apply, please provide:

- x a brief description of the program or course learning outcome that you would be assessing and the program to which the course applies (identify if it applies to GE, major, or both)

-

Title: Written Communication Institutional Learning Outcome (ILO) Assessment

Facilitator:

Written Communication is one of CSUEB's institutional learning outcomes for students, focusing on the applied ability to communicate ideas, perspectives, and values clearly and persuasively, to use skills fundamental for active participation in a democratic society and for achievement in professional life after graduation. Members of this FLC will collaborate in developing a rubric to assess student work for the presence of these competencies and apply the rubric in one of their courses to assess

To apply, please provide:

- x a brief description of the program or course learning outcome that you would be assessing and the program to which the course applies (identify if it applies to GE, major, or both)

COMMUNICATION

Graduates of CSUEB will be able to communicate ideas, perspectives, and values clearly and persuasively while listening openly to others.

Developing strong oral, written, and creative communication skills is an important learning outcome for our graduates because these skills are fundamental to active participation in a democratic society and to achievement in professional life after graduation. Communication implies an exchange between two or more people, so communication is about expressing one's own ideas, perspectives, and values as well as understanding the ideas, perspectives, and values of others.

Strong communication skills include:

- identifying the audience and purpose for a particular communication situation;
- representing knowledge orally, visually, and in writing;
- expressing ideas, perspectives and values clearly and coherently;
- supporting ideas, perspectives, and values with reasons and evidence;
- understanding other perspectives on a particular topic;
- locating, evaluating and using information appropriately;
- listening actively, empathetically, and respectfully;
- being open to new ideas and to changing perspectives when presented with new evidence;
- using various forms of communication and communication technologies.

CSU East Bay

Institutional Learning Outcomes

The California State University East Bay Institutional Learning Outcomes (ILOs) express a shared, campus-wide articulation of expectations for all degree recipients. Graduates of CSUEB will be able to:

- y think critically and creatively and apply analytical and quantitative reasoning to address complex challenges and everyday problems;
- y communicate ideas, perspectives, and values clearly and persuasively while listening openly to others;
- y apply knowledge of diversity and multicultural competencies to promote equity and social justice in our communities;
- y

2013-14 Critical Thinking Competency

- y 2013: Pilot of new rubric to assess first-year critical thinking outcomes
- y 2013-14: One year pilot with 19 faculty teaching the major with a critical thinking learning outcome

Iterative Collaborative Process

CRITICAL THINKING VALUE RUBRIC

Definition
Critical thinking is a habit of mind characterized by the comprehensive exploration of issues, ideas, artifacts, and events before accepting or formulating an opinion or conclusion.

Findings

Importance of:

- y Curriculum mapping
- y Involving faculty in all steps of the process
- y Familiarizing faculty with the rubric before creating the assignment
- y Designing well-crafted assignments
- y Sharing rubric with students impacts student learning and quality of assignments produced

About the Process:

- y Electronic learning assessment process+ ongoing support+ collaborative helped make assessment process engaging and relevant to faculty; faculty spread the word
- y Enhanced teaching and learning
- y Faculty collaboration experienced as faculty development; appreciated learning about critical thinking across disciplines
- y Mixed results about applicability of one rubric across disciplines

Closing the Loop on Findings

Next Steps:

- y Report findings to all faculty
- y Faculty meet to discuss curriculum
- y Faculty development /reference tools for assignment design
- y Further revision of rubric for specific disciplines

CALIFORNIA STATE UNIVERSITY EAST BAY
HUMAN SUBJECTS RESEARCH PROTOCOL

Use of this template (outline) is suggested when submitting a research protocol to the IRB. Your responses should be in terms which may be understood by a non-specialist.

Please complete all sections of this template. If any section is not applicable, list the heading and simply indicate **NA**.

Instructions are bracketed and in italics. Please remove instructions prior to submission.

Problem & Background : After a careful review of a number of electronic learning assessment platforms, CSU East Bay selected and installed Blackboard Outcomes in the Blackboard course management system in the summer of 2013. This was in direct response to faculty requests to simplify the process of sampling student work and analyze the results in order to assess achievement of student learning outcomes across programs (undergraduate, graduate, and certificate programs as well as student services and in administrative units).

Blackboard Outcomes allows groups of faculty to sample student work for program assessment as well as create

closing the loop for improved student learning.

IX. HUMAN SUBJECTS INVOLVEMENT

Students who are enrolled in courses instructed by faculty participating in the project during the research period.

A. DESCRIPTION

Other than notification by participating faculty (see Risk Reduction section), students will complete their course work in the customary way.

B. SUBJECT POPULATION

Students enrolled during the research period in courses that participating faculty have aligned to one or more learning outcomes.

C. RESEARCH MATERIAL

f ... — Ž — › ™ ‹ Ž Ž ò f Ž ‹ %o • ó f • † ... ‹ ^ ‹ ‘ — ” • † f • • ‹ %o • • † • — — ‘ ‘ • ò 4V—Ee2Qo7..

Trained, authorized administrators will create assessment collections ensuring they are coded for student confidentiality.

No faculty names will be used referencing inter-rater reliability if/when work is published. Additionally, faculty will be refreshed on the importance of professionalism and confidentiality when completing this analysis.

I. RISK/BENEFIT

This electronic process follows methods consistent with what faculty are already doing. Faculty are aware of the Family Educational Rights and Privacy Act (FERPA) and already take measures to maintain student confidentiality using current assessment methods.
